

March 1, 1949.

Dr. Ove Moller,
Allmänna Sjukhuset,
Malmö, Sweden.

Dear Dr. Moller,

Thank you for your letter and the reprint " Bacterial Variation
in Escherichia coli ".

I would very much like to accomodate your request for a visit here.
Unfortunately, our facilities are limited, and there might be some dif-
ficulty in finding space in which you could do experimental work. However,
it might be possible to make some arrangement for a few weeks during
the summer months, if you can find suitable support for your personal
expenses. I regret that I cannot offer to be more hospitable, but hope
that you will be able to take advantage of what we have available.

Yours very sincerely,

Joshua Lederberg,
Assistant Professor of Genetics
